Product Data Sheet

CL45OO Smart Glass Door Lock

4500 BS GD

The CL4500 Smart Lock brings access control, flexibility and NetCode® technology to glass door applications. A stylish complement to offices, meeting rooms and hired spaces.

The CL4500 GD is a medium duty, electronic patch lock offering all the benefits of Codelocks' Smart Technology. Suitable for inswing doors, the lock fits existing Rondo type glass door preparations. As standard the CL4500 GD is supplied with a flat strike for fitting to solid door frames. A patch strike box is available to purchase separately for fitting locks to a glass door with a glass side panel.

Managing and operating locks has never been easier. The CL4500 Smart Lock has been innovatively designed to combine smart technology with traditional access control features. Operate and program locks directly via the keypad or via any Bluetooth compatible smartphone by downloading the App. Simple upgrade opportunities from the CL4000 GD Electronic.

Key Features

- Two year guarantee[1]
- Easy to install and operate
- Suitable for Rondo type door prep.
- Universal, non-handed patch lock
- RFID access + multiple code users
- NetCode® technology
- Key override as standard
- Code free access functionality
- Simple upgrades from CL4000 GD
